

# INSINGER PROJECT SPOTLIGHT

Shelby County Jail, Tennessee

Correctional institutions require special attention to detail and Insinger has it covered.

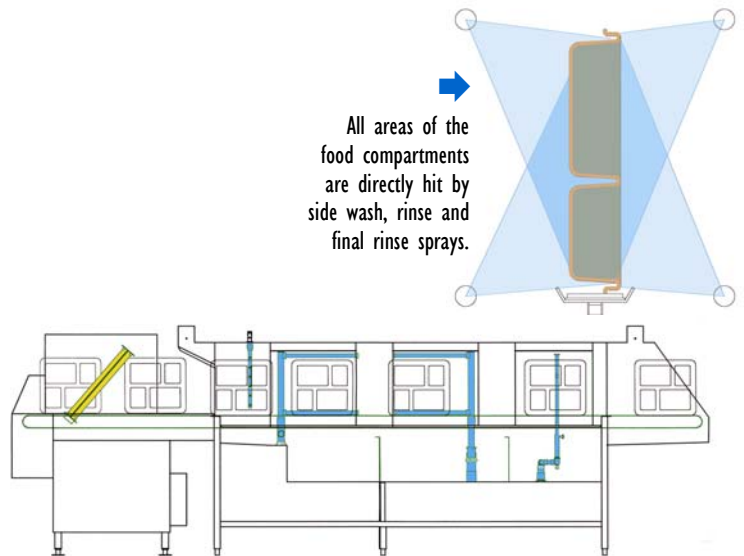

With the recent installation at Shelby County Jail in Tennessee, Insinger added another success story to its portfolio.

At Shelby County Jail, with a current capacity of 3,500 inmates and a planned expansion to house 5,000, the everyday foodservice operation is a huge undertaking.

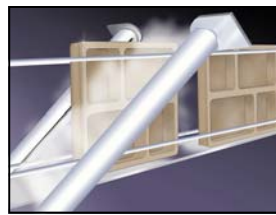

*That's where Insinger comes in!*

Three Trac 878 Traywashers with Tray Dryers and one Super 106-2 Rack Conveyor were put to work to tackle the daily challenge of providing over 10,000 meals per day. Each piece of equipment has the added Insinger Security Package designed specifically for high risk areas. The heavy duty table guard rails paired with the heavy duty Trac 878's are the right solution for cleaning and sanitizing thermal insulated (and other types) of trays in a jail setting.

**Put Insinger To Work For You!**  
800-344-4802

All areas of the food compartments are directly hit by side wash, rinse and final rinse sprays.

The unique Air Wiper design virtually strips all the water off trays, giving you dry trays and a cleaner, drier workplace.

## INSTALLED INSINGER EQUIPMENT LIST:

- 3 Trac 878 traywashers
- 3 TD 321-2 traydryers
- 1 Super 106-2 rack conveyor dishwasher
- Security Packages
