- Series S-300-3SA Disposer
- (2) Series N-200L-3 Disposers
- (2) Tray Conveyors
- (2) QuadJet Aqua-Scrubber Pot & Pan Washing Systems

If you've dined in a Cornell facility within the last thirty years, you've come into contact with Insinger. On a daily basis, Insinger equipment washes and sanitizes the ware used to feed nearly 20,000 students, faculty members, staff, and alumni.

Since the late 1980's, Insinger Machine Co. ("Insinger") has provided commercial dishwashers and related equipment to Cornell University, Cornell Dining, The Cornell Club of New York, The Statler Hotel, and the School of Hotel Administration.

Insinger dishwashers can be found in Willard Straight, Oakenshield's, Trillium Dining at Kennedy Hall, Risley Hall, The Statler Hotel, Life Sciences Laboratories, Cornell Dairy Bar, Student Labs at the School of Hotel Administration, Robert Purcell Dining, Appell Commons, The Cornell Club of New York, and all of the dining facilities located in the "West Campus Housing Initiative"—including a variety of sororities and fraternities.

During the past thirty (30) years, Insinger equipment has proven its claims of durability and reliability having survived Cornell's 24/7/365 foodservice operations and heavy usage by union and student dish machine operators. Insinger uses generic, non-OEM components in the design, making the equipment easy to service and maintain. This offers a lower life-cycle cost to operators.
